Marco Mina Moris Mobile App Developer

marcominamories@gmail.com (+20) 1287035405 Marco Mina Marco-Mina-Moris Exempted

marco-mina-portfolio.vercel.app

SUMMARY

Flutter developer with hands-on experience shipping 12+ cross-platform mobile apps across e-commerce, food & beverage, education, and service-booking domains — from UI to real backend integration (Laravel/Sanctum, Firebase, Supabase) and payment gateway integration (Paymob). Comfortable owning a feature end-to-end: architecture (Clean Architecture/MVVM), state management (BLoC/Cubit/Riverpod/GetX), API integration, and deployment prep for Google Play and App Store. Also mentors junior Flutter developers as a part-time Technical Instructor.

EDUCATION

Bachelor's Degree in Management Information Systems (MIS), *Science Valley Academy* 2021 – 2025
GPA: 3.55/4.00

Experience

Mobile Application Developer, *Stitch for Technology Solutions* 09/2026 – Present
Cairo
- Building, maintaining, and optimizing mobile applications for iOS and Android in collaboration with the engineering team
- Integrating RESTful APIs, push notification services, and third-party mobile SDKs
- Implementing chatbot/conversational interfaces within mobile apps with robust backend integration
- Managing app builds and releases through CI/CD pipelines, submitting updates to Google Play Store and Apple App Store
- Collaborating with the Head of Technology, backend engineers, and QA to deliver features on schedule

Flutter Developer, *Marketopia* 08/2026 – 10/2026
Alexandria
- Developed cross-platform mobile applications using Flutter and Dart
- Built responsive, user-friendly interfaces and implemented core application features
- Applied Clean Architecture and state management practices to create maintainable applications
- Integrated APIs and backend services to support real-world application functionality
- Tested and debugged applications to ensure stability, performance, and a smooth user experience
- Prepared applications for deployment on Google Play Store and Apple App Store, currently in the testing phase

Part-Time Flutter Developer & Technical Instructor, *B-Deveolper* 06/2026 – 09/2026
Remote
- Built and maintained cross-platform mobile applications using Flutter and Dart.
- Designed and delivered Flutter training sessions with hands-on, real-world projects.
- Mentored aspiring Flutter developers through code reviews, debugging, and technical guidance.
- Collaborated with the development team to implement scalable and maintainable features.
- Balanced software development responsibilities with technical instruction .

Cross Platform Mobile App Developer, *Digital Egypt Pioneers Initiative (DEPI)* 11/2025 – 05/2026
- Developed cross-platform mobile apps using Flutter & Dart following Clean Architecture.
- Implemented BLoC/Cubit state management and integrated REST APIs, Firebase, and Google Maps.
- Worked on real-world projects, enhancing problem-solving and teamwork skills.

Mobile App Development Intern, *National Telecommunication Institute (NTI)* 06/2025 – 08/2025
- Participated in a 120-hour internship in mobile development with Flutter and Dart.
- Worked on practical app development projects with backend integration and real-time updates.
- Focused on Clean Architecture, State Management (BLoC), and app deployment processes.

Training Flutter Developer, *Information Technology Institute (ITI)* 09/2024 – 10/2024
- Attended a 60-hour intensive course focused on Flutter mobile app development.
- Learned Object-Oriented Programming, Dart, Flutter basics, and version control using Git.
- Delivered a complete app project as part of the training.

SKILLS

Programming Languages: Dart, Asynchronous Programming, OOP, SOLID, Algorithms & Data structure, Design Patterns, Problem Solving

Flutter Development: Bloc, Cubit, Firebase, Firebase Crashlytics, Supabase,Hive, Sqllite, Retrofit, JSON Serialization, Freezed. Pagination, Flavors, Fastlane, RESTful API, Unit Testing, Google Maps APIs, Notifications, Flutter Web

Development Practices: Clean Code, UI Development, CI/CD, App Deployment, Debugging

Methodologies: SDLC, MVVM, Clean Architecture

Tools: GitHub, Version Control Systems (git), VS Code, Android Studio, Figma, Postman, Cursor, Antigravity,Copilot. Teams, Azure DevOps, Dart Devtools

Other Skills: Animations & Custom UI, Real-time Features, Microservices, Localization, Agile & Scrum, Teamwork & Communication.

PROJECTS

DO Cafe, *Flutter Project | Marketopia*
- Developed a cafe ordering app supporting Takeaway, Dine-in, and Delivery workflows.
- Integrated a real Laravel/Sanctum backend with wishlist, saved addresses, and order management.
- Integrated Paymob online payments through an in-app WebView.
- Prepared a signed release build for Google Play deployment.

Acta Chemical, *Flutter Project | Marketopia*
- Developed an e-commerce app for a chemical products company.
- Implemented product sections for cosmetics, detergents, raw materials, and specialty serums.
- Integrated a real Laravel/Sanctum backend and multiple payment methods.
- Added downloadable PDF product booklets.

Bright Star, *Flutter Project | Marketopia*
- Developed a medical equipment and supplies e-commerce application.
- Implemented Riverpod state management and repository-pattern architecture.
- Built a WhatsApp-based ordering flow.
- Structured the application for real API integration.

Daniella, *Flutter Project | Marketopia*
- Developed a bilingual Arabic/English luxury swimwear e-commerce app.
- Built a polished, responsive UI with native-feel navigation.
- Implemented smooth micro-interactions and user-friendly shopping flows.

Tarwiqa (ترويقة), *Flutter Project | Marketopia*
- Developed an Arabic RTL home-cleaning service booking app focused on Alexandria.
- Converted 20+ custom UI mockups into a functional Flutter application.
- Integrated a real Laravel API for authentication, catalog, and orders.

Easy Math for Kids, *Flutter Project | Marketopia*
- Developed a bilingual Arabic/English educational app for mental math and abacus learning.
- Built an interactive Soroban widget and Flash Anzan training drills.
- Implemented gamification and parent analytics to track learning progress.

Murshid App — مُرشد, *Freelance Flutter Project*
Developed a smart university management application using Flutter with Feature-based MVVM architecture. Implemented scalable state management using GetX and integrated Supabase for authentication, real-time updates, and database management. Added push notifications filtered per enrolled courses, Arabic/English localization, offline storage with Hive, and Google Maps navigation for a modern responsive UI serving both students and professors.

ScorePulse - Live Football App, *(GitHub)*
Real-time football app providing live scores, fixtures, standings, and match statistics. Built with Clean Architecture and BLoC, featuring seamless API integration and a smooth UI with dark/light mode support.

Food Delivery App, *(GitHub)*
A comprehensive Flutter-based food delivery app featuring Firebase Authentication (Email/Password, Google, Facebook), Google Maps integration for live tracking, and a secure online payment gateway. Built with MVVM architecture and Dio for clean, scalable, and maintainable code with an enhanced user experience

Shoply, *(GitHub)*
A full-featured e-commerce mobile app built with Flutter & Dart. Utilized REST API for dynamic data integration, and implemented advanced state management using Bloc and Cubit. Designed with clean architecture principles for high maintainability, modularity, and scalability.

COURSES

Flutter App Creation: Google Maps Integration Guide, *Tharwat Samy Academy* 2025

Flutter development diploma, *Route IT Training Center* 2025
